English

a complete English pronunciation course

# course overview

The key to free expression in English isn't through grammar study, vocabulary building or conversation; it's through the adoption and practice of the English sound system. Without this foundation, any progress is held back by uncertainty, insecurity and self-doubt. This course offers complete and practical training to help you speak confidently, understand others with ease and truly enjoy the sound of your own voice.

In this complete 16-hour pronunciation course – supported by hours of online materials – you'll be guided through transforming written words into fluid, rhythmic speech. You will learn to observe your current pronunciation habits, overcome unconscious patterns, and build new habits of articulation and rhythm — making your communication more authentic and engaging.
